Subject: RE: 649.5212/ 649.5214

Marc,

I agree that we can continue to ship parts using the custom extrusion until we have depleted stock of the material. I'm on board with what you are suggesting below.

-Pablo

Subject: RE: 649.5212/ 649.5214

Hi Pablo,

Manufacturing really needs you to chime in on this one please.

Also, what is the status of drawings 649.4700 and 649.5100?

Thanks,
Marc

Subject: RE: 649.5212/ 649.5214

Pablo,

For the record, and I'm not sure why, but Hawkesbury never got a copy of 649.5200 Rev. B. So the last few kits have been shipped with 649.5212/.5214 were still featuring a slight bent. AWPC requested removal of the bent "if possible" to ease installation. I don't believe it is critical to ship AWPC's next kits if 649.5212/.5214 still feature this slight bent. HBY can probably deplete its stock of custom extrusion and then move on to a stock angle iron. However, the 649.5212/.5214 Rev. C must feature the other changes introduced with 649.5200 Rev. C.

Regards,

MARC BELLAVANCE

Subject: 649.5212/ 649.5214

For 649.5212/5214 bracket we had made a custom extrusion in the past for it. We still have 129 feet left. Now the new dwg those not have the slit bend in it.

-We would need to order some angle and this could take a few week to receive it.
